Problem Statement

Duolingo teaches grammar and vocabulary, but cultural context is inconsistent, passive, and optional.

Learners risk sounding awkward or making etiquette mistakes despite knowing the “correct” words.

Lack of cultural fluency limits confidence in real-world interactions.

Market Research & Insights

1

65% of learners say cultural learning is their top motivator for studying a language

2

70% of pandemic-era learners cite a heritage or culture connection to the language

3

18% of Japanese learners join due to cultural interest (8-10% for global languages)

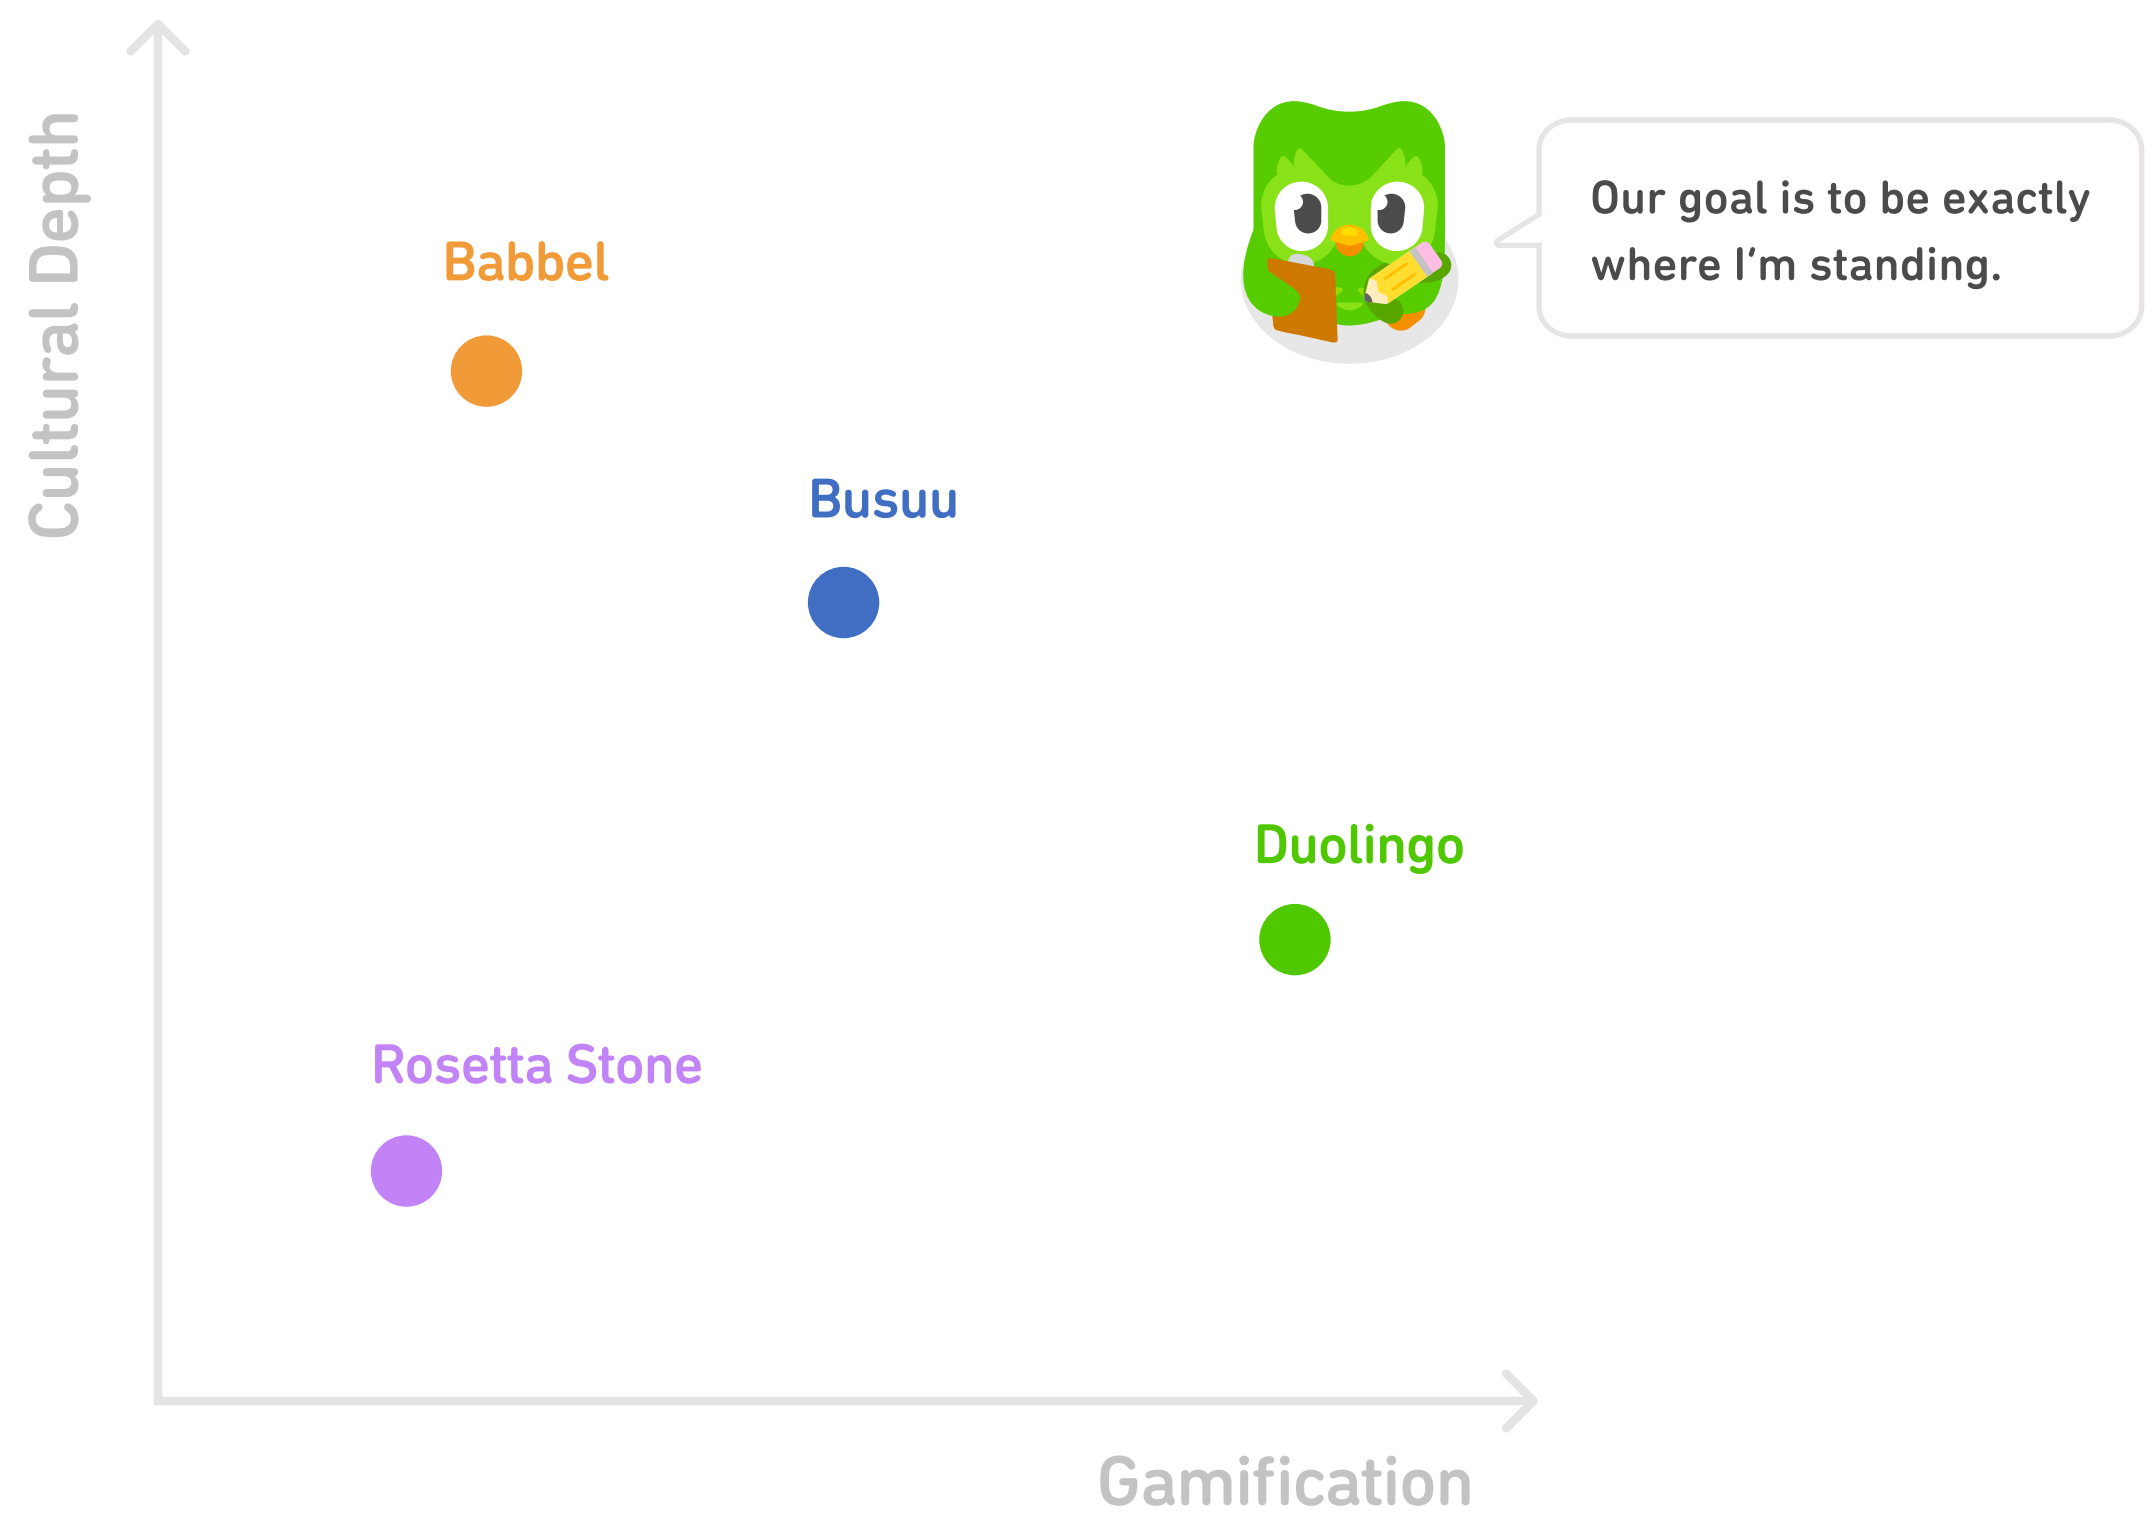

Younger learners are drawn to global pop culture (K-pop, anime, foreign film), while heritage learners seek a deeper connection to their identity and family (US learners have 6x higher interest in heritage connection that the global average).

 3

Impact

For the user

- 1. Builds confidence to use a new language in the real world
- 2. Lessons that develop context and understanding of how people talk
- 3. Motivation that comes from culture, not just grammar

For Duolingo

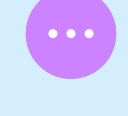

- 1. Higher retention because learning feels more useful
- 2. More learners upgrading to Plus since lessons go deeper
- 3. Unique market position as the only product gamifying cultural learning
